Himanshu Mishra

+91 9559537785 | mishrahimanshu0076@gmail.com | LinkedIn | GitHub | Hoshiarpur, India

Education

UIET, Panjab University — Hoshiarpur, Punjab
B.E. in Information Technology – CGPA: 8.48 — *Aug 2023 – May 2027*

Achievements

Meta Hackercup: Ranked in the **Top 1600** out of **13,500+** global participants.

LeetCode: Achieved **Knight status (1898)**, placing in the **Top 4%** worldwide.

Codeforces Specialist: Attained a maximum rating of **1484**, ranking in the **Top 4%** in India.

ACM ICPC Asia Kanpur Prelims: Ranked **1123** out of **2500+** participants.

Work Experience

Software Developer Intern — Sep 2026 – Present
Shortsqueeze Pvt. Ltd. — *Remote*

- Developed and maintained **backend APIs** and product functionality with focus on reliable data flow and API integration.
- Debugged and tested application features, resolving issues and identifying edge cases to improve feature reliability.

Open Source Contributor — Sep 2026 – Present
Keycloak – Red Hat — *Remote*

- Contributed to **Keycloak**, an IAM platform, with 2 merged production fixes across OAuth/OIDC and client registration.
- Fixed a **client-secret disclosure vulnerability** in Dynamic Client Registration by masking confidential secrets for `view-clients` users while preserving authorized access for `manage-clients` and registration-token holders.
- Fixed an **OIDC scope regression during token refresh**, ensuring the `openid` scope is preserved when refresh requests narrow the requested scope.

Software Developer Internship — Jun 2025 – Jul 2025
Ricoz — *Remote*

- Developed the **Book My Studio** Android application using Kotlin and Jetpack Compose.
- Implemented API integrations with **Retrofit** and asynchronous operations through **Kotlin Coroutines**.
- Created responsive UI screens following **Material Design** and the **MVVM architecture** pattern.

Projects

Listen Buddy – Audio Streaming App Without Internet | Github | Demo Link — Nov 2025 – Feb 2026

- Engineered a **Wi-Fi synchronized music streaming app** with no internet dependency.
- Implemented **UDP peer discovery** and reliable **TCP socket streaming** for seamless connectivity.
- **Technologies:** Kotlin, UDP, TCP, Coroutines, MVVM, Android Studio

AI Student Complaint Web App | Github | Website — Jul 2025 – Oct 2025

- Designed a **role-based complaint workflow** featuring escalation processes and **SLA tracking**.
- Implemented **few-shot prompting** with LLMs to predict complaint severity and classify departments.
- **Technologies:** Spring Boot, PostgreSQL, AI

Interview Preparation Platform | Github — Feb 2025 – Apr 2025

- Developed a **Docker-based code execution engine** using ephemeral containers with isolated execution, real-time verdicts.
- Implemented collaborative coding via **WebSockets** and peer-to-peer video interviews using **WebRTC**.
- **Technologies:** Spring Boot, PostgreSQL, WebSockets, WebRTC

Skills

Languages: C, C++, Java, Kotlin, SQL

Databases: PostgreSQL, MongoDB, Firebase, MySQL

Frameworks & Libraries: Spring Boot, Tailwind CSS, MVVM

Tools: Git, Linux, IntelliJ, Android Studio, Postman, GitHub

Co-Curricular Activities

Mentor – Official Technical Society — Jul 2024 – Present
Panjab University SSG Regional Centre

- **Mentored 50+ students** in C/C++ through structured workshops and hands-on coding sessions.
- **Organized 10+ coding contests** on HackerRank and facilitated peer-learning problem-solving groups.
- **Curated competitive programming resources** and supported student problem-solving development.
